DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, 28-31 and 38-40, drawn to A Catalyst Composition, classified in class 502, subclass 159.
- II. Claims 17-27, drawn to Method of Preparing a Polymer Containing Catalyst, classified in class 525, subclass 7.
- III. Claims 32-37, drawn to Method for Polymerization of a Macrocyclic Oligoester, classified in class 525, subclass 8.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and III are related as process of making and process of using the product. The use as claimed cannot be practiced with a materially different product. Since the product is not allowable, restriction is proper between said method of making and method of using.

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the catalyst as claimed can be made by another and materially different process such as using Zr halide or Hf halide based catalyst.

Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used with a materially different process such as alpha olefin polymerization.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention I:

- a) Claims 1 and 2 are drawn to Sn or Ti oxy, thiol or nitro based heteroatom catalyst.
- b) Claim 3 is drawn to a Sn or Ti polyalkylene or polyether group catalyst.
- c) Claims 4-10 are drawn to Ti polymeric alkoxy compound catalyst.
- d) Claims 11-16 are drawn to Sn polymeric dialkoxy compound catalyst.
- e) Claims 28-31 are drawn to a blend material of a macrocyclic oligoester and a polymerization catalyst.
- f) Claims 38-40 are drawn to polyalkene or polyether compound catalyst.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-16 and 38-40 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1755

A telephone call was made to Ira Heffan on 06/18/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
